Report of the Superintendent of Schools

To the school committee and citizens of the Town of Denmark:

Herewith my tenth annual report of the progress, condition and needs of the schools of the Town of Denmark:

Schools opened for the year on September 12, 1932, with the following teachers in charge:

East, Sadie Ingalls, Denmark.

Primary, Gladys Lowell, South Windham.

Grammar, Alice Edgecomb, Kezar Falls.

High, Principal, Ralph G. Reed, Bridgton.

High, Assistant, Katharine Rolfe, Bridgton.

Two teachers are new to the schools of Denmark. Mr. Reed, a graduate of Bates College, has had many years of experience. Miss Edgecomb is a graduate of Gorham Normal School and had taught one year before coming to us.

During the fall term it was necessary to exchange rooms and to place the Primary School in the former grammar room, and to house the Grammar School in the original primary room. This was because of the larger enrollment in the grammar school. The matter was easy to adjust because of the fact that our desks are movable. We hope and expect that this will be but a temporary arrangement as the front room was intended for and belongs to the little ones.

MAINTENANCE

No repairs except the usual upkeep replacements have been made nor have such been necessary. We are glad to report that the water system has given us no serious trouble thus far this year. The flush bowls do not function as well as they should. They should be put into proper condition. The ceiling around the chimney at the East building should be replaced and painted.

MUSIC

The course in music, under the supervision of Mr. Gatchell, is showing happy results. We certainly hope that this course may be continued. Mr. Gatchell's report will be found below.

COUNTY FIELD NURSE

We have two county field nurses this year. Miss Philomena Barber, 18 Free St., Rumford, is attending to the work in the schools. Miss Elsie Anderson, Norway, is doing home work.

No single item of municipal expenditures can approach the value received as does the appropriation for the county field nurse. This year the amount asked is \$23.00 as against \$52.00 asked last year.

Report of the county field nurse:

Number of children inspected	98
Number of defects of teeth	74
Number of defects of throat	20
Number of defects of nasal passages	6
Number of defects of glands	11
Number of defects of vision	5
Number of defects of weight	10
Number of defects of skin	1
Number of home calls	15
Number of interviews	3

The usual statistics as to teachers, salaries, registration, grading, census, etc., will be found below.

All possible economics are being made. The average salary of our elementary teachers is \$512.00 per year. The average for the State in 1932 for women elementary teachers was \$877.58. Thus it will be seen the teachers in our elementary schools receive this year \$365.58 less than the average for Maine. The average for high school teachers, men, in 1932, was \$1,938.16, we pay \$1,200.00; same for women was \$1,324.87, we pay \$864.00. We believe that we are securing our conveyance, janitoring and fuel for about as low a figure as is possible. We are always glad to receive any suggestions. The superintendent voluntarily offered to refund ten per cent of the town's share of his salary, payable at the end of his year, July 1, 1933.

This year every possible economy, consistent with proper service and fair dealing, is being made. Next year we are informed that the State funds will be decreased by from 18 per cent to 20 per cent. This is due to the decrease in the valuation of the State and a consequent decrease in the millage tax for the State school fund.

It becomes, then, a question of what is the most important function of municipal government. What cuts can be made? Where shall they be made? All will agree, of course, that any town must provide first for those in need. Looking at it from a long range viewpoint, it seems to us that after it has provided for the needy, a town or city should next see to it that the education of its future citizens is provided for. "The failure or success of the character of our future citizenship

depends in large measure upon the educational opportunities which we offer to our boys and girls in our public schools."

As taxpayers we know that the tax burden must be reduced. As citizens and parents we know that the schools must be continued and supported in such manner that permanent injury to the next generation, that generation which is to begin where we leave off, and even before we leave off, must not take place. We are confronted with the problem of a reduced income, both State and municipal, which must take care of our schools. This problem requires the thoughtful care, study and common sense coöperation of all citizens everywhere.

Respectfully submitted,

CHAS. A. SNOW,

Superintendent of Schools.

Report of the Supervisor of Music

The music program may be divided into four general divisions. In the primary grades, the ability to "carry a tune" and to sing in tune have been the objectives. To accomplish these, many songs have been taught and much work in the matching of tones done.

The second division deals with the grammar grades. Here work has been done to build up the power of reading music. The "Do, re, mi" method, adapted to children, has been used. This is leading up to part singing, the objective in these grades.

In the high school, the problems involved are: Drawing out the boys' changed voices and part singing. The work has been hindered by old and consequently uninteresting material, yet the work of the boys during the past year has improved greatly, and, now that some fresh material (a cantata) has been obtained, interest is rapidly growing.

The advance in music which has been made throughout the schools during the past year has been aided by the new policy of weekly visits by the supervisor of music instead of fortnightly visits as before. This has been done at no additional expense to the town.

The fourth division of the music program is applied to the whole school system. This has to do with the artistry of music, the living, delighting part of the subject which causes it to be carried into life after school to a greater extent than most subjects. This is not taught so much as it is caught by the pupils from the musicianship of the supervisor. Thus the children of Denmark are learning to participate in and thus truly to appreciate the finest of all arts, and the foundation of an infinitely richer life is not being denied them.

Respectfully submitted,

JOHN C. GATCHELL.
